

Nutrition in Healthcare: Meal Delivery Solutions

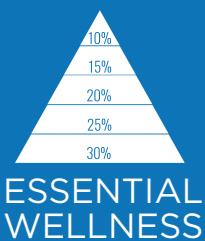

McLane Health Solutions designs, assembles and delivers nutritiously tailored, pantry style meal kits as part of a holistic approach to healthcare addressing prevention and management of chronic conditions, balanced nutrition, and food insecurity.

High Quality,
Nutritious,
Pantry-Style Foods

Dietitian Developed
Menus for Specific
Nutritional Needs

Flexible,
Customizable
Solutions

HEART HEALTH /
HYPERTENSION

DIABETES /
PRE-DIABETES

CANCER / ONCOLOGY
NUTRITION

Directly address
the impacts of
nutrition on
health

Lower the cost
burden for
patients, providers
and payers

Reduce ER
visits and
hospital
readmissions

Benefits

PREVENTION

- Improve population health
- Advance patient / consumer education
- Prevent chronic illness and decrease comorbidities
- Drive behavioral change with patients
- Promote socio-economic equity
- Provide encouragement to keep medical appointments
- Address social determinants of health
- Promote family-wide health
- Increase medical adherence

COST
MANAGEMENT

- Reduce ER visits, hospitalizations, and readmissions
- Better align incentives with payers, providers and pharmaceuticals
- Lower costs on any medically unnecessary drug use
- Reduce unpaid patient services
- Better targeting of high-cost, high-risk patients
- Help optimize performance within capitation models
- Facilitate inter-sector collaboration on risk-based contracts
- Address shift to value-based models
- Promote shift from inpatient care to outpatient and ambulatory care

SUPPORT

- Strengthen relationships with and support the work of physicians
- Increase patient satisfaction and survey scores
- Support coordination and transition in care
- Address food deserts and food swamps
- Build relationships with and in the support of diverse communities
- Further development of new business models
- Support patient centricity
- Strengthen your brand and attract new members and patients
- Improve relationships and engagement with existing members and patients
- Standardize the diets of clinical trial participants
